

**CELL AND TISSUE RESPONSE TO
OSTEOINDUCTIVE CALCIUM PHOSPHATE ARCHITECTURE**

DISSERTATION

to obtain
the degree of doctor at the University of Twente,
on the authority of the rector magnificus,
Prof. Dr. H. Brinksma,
on account of the decision of the graduation committee,
to be publicly defended
on Wednesday, November 19th, 2014, 14:45.

By

Noel Lee Davison
Born December 9th, 1983
In Portland, Oregon, United States of America

Promoter:

Prof. Dr. Joost D. de Bruijn (University of Twente)

Co-Promoter:

Dr. Florence Barrère-de Groot (Xpand Biotechnology, BV)

CONTENTS

Chapter 1

General introduction

Chapter 2

In vivo performance of microstructured calcium phosphate formulated in novel water-free carriers

Chapter 3

Microstructure of biphasic calcium phosphate discs induces ectopic bone formation and promotes the formation of osteoclast-like cells in vitro and in vivo

Chapter 4

Submicron-scale surface architecture of tricalcium phosphate directs osteogenesis in vitro and in vivo

Chapter 5

Liposomal clodronate inhibition of osteoclastogenesis and osteoinduction by submicrostructured beta-tricalcium phosphate

Chapter 6

Osteoclast resorption of beta-tricalcium phosphate controlled by surface architecture

Chapter 7

General discussion

Chapter 8

Perspectives and future directions
